## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Combined Liquid Crystal Display Panel and Solar Cell Device.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

brightness by said liquid crystal display panel (20) is performed using a low reflectance characteristic of said solar battery assembly (300) (see column 4, lines 31-42).

With regards to the limitations stated in claim 93: Doane discloses, in the figure below, a liquid crystal display device (20) wherein a solar battery (300) is provided to face at least a part of a surface opposite to a visual recognition side of said liquid crystal display panel (20), light is applied to said solar battery (300) through a transmission portion (22 or 24) of said liquid crystal display panel (20) to generate electric power, and a film (40) having substantially same spectral reflectance as that of a power generation portion of said solar battery (300) is provided on the visual recognition side of a suitable electrode portion/array of said solar battery (300).

Art Unit: 2841

With regards to the limitations stated in claim 94: Doane discloses, in the figure below, a liquid crystal display device (20) wherein a solar battery (300) is provided to face at least a part of a surface opposite to a visual recognition side of said liquid crystal display panel (20), light is applied to said solar battery (300) through a transmission portion (22 or 24) of said liquid crystal display panel (20) to generate electric power, and a printed layer/liquid crystal material (40) having substantially same spectral reflectance as that of a power generation portion of said solar battery (300) is provided on non-power-generation portions of said solar battery.
